Experience

Software Development Intern (Python)
DigiSamaksh Private Limited
Jun 1 – Aug 10, 2026

- Designed and built a job-portal recommendation engine in Python, using similarity-matching logic to rank candidates against listings by skills and experience.
- Cleaned, preprocessed and analyzed candidate/job data with NumPy and Pandas, improving the relevance of generated matches.
- Owned features end to end in an Agile workflow: development, debugging and testing, with Git/GitHub version control and code review before delivery.

Research Intern (AI/ML)
Wildlife Institute of India
Mar – Apr 2026

- Built, trained and tested a Convolutional Neural Network (CNN) in Python to identify individual elephants from photographs, enabling counting and photo-based tracking.
- Preprocessed and augmented image datasets using Python, NumPy and OpenCV to improve model accuracy and generalization.

Full Stack Developer Intern
EduSkills Virtual Internship (AICTE)
Jan – Mar 2026 | Grade: O (Outstanding)

- Completed a 10-week Full Stack internship (National Internship Portal, with IILM University); built front-end features using HTML, CSS, JavaScript and REST API integration, following SDLC practices.

Academic Projects

AI-Based Student Performance Prediction & Personalized Learning Recommendation
Python, Scikit-learn, Streamlit, Pandas, NumPy
GitHub

- Built an end-to-end ML project (team of 2) that predicts student academic performance and recommends personalized learning resources based on strengths, weaknesses and study behavior.
- Developed the Scikit-learn model pipeline with a Streamlit web app for interactive predictions; structured into backend and app modules.

AI-Based Doctor-Patient Appointment System
Python, Flask, ML, MySQL, NumPy, Pandas, REST APIs
Live Demo

- Implemented an AI-driven, symptom-based doctor recommendation model in Python, using NumPy/Pandas for preprocessing, feature matching and output testing.
- Built a full-stack appointment scheduling system with a Flask REST API backend and MySQL database (schema design, SQL queries) for persistent storage.

Library Management System (AI-Enhanced)
C, File Handling, Basic AI Logic, Vercel
Live Demo

- Developed a file-based library system in C (books, users, issue/return records) with recommendation logic based on borrowing history; deployed a live demo on Vercel.

Professional Summary

Final-year B.Tech CSE student (CGPA 9.3) seeking a Full Stack / Web Developer role. Experienced in building web apps with JavaScript, TypeScript, React, Node.js/Express, REST APIs and SQL/NoSQL databases, plus Python and ML work (CNN). Comfortable with Git/GitHub, code reviews, debugging and Agile teams, with a focus on clean, maintainable, tested code.

Most Proud Of

CGPA 9.3
Strong academic record in B.Tech CSE at IILM University.

Grade O (Outstanding)
EduSkills (AICTE) Full Stack virtual internship.

CNN for Elephant Identification
Built an AI model at the Wildlife Institute of India.

100% Score
Communication Skills, P2E Skills (YuWaah/UNICEF).

Technical Skills

Languages
JavaScript (ES6+) | TypeScript | Python | C | C++ | SQL

Front-End
React.js | Next.js | Redux | HTML5 | CSS3 | Tailwind CSS | Bootstrap

Back-End
Node.js | Express.js | Flask | REST APIs | JWT Auth | MVC

Databases
MySQL | PostgreSQL | MongoDB

Data & AI/ML
NumPy | Pandas | Scikit-learn | TensorFlow/Keras | OpenCV | CNN | Streamlit | GenAI & LLM Basics

Testing & Tools
Jest | PyTest | Postman | Git & GitHub | Jira | Agile/Scrum | Vercel

Core CS
DSA | OOP | OS | DBMS | Computer Networks

Education

B.Tech, Computer Science and Engineering
IILM University
2023 – 2027 | CGPA: 9.3

Certifications

- Generative AI Fundamentals and Applications – Nasscom FutureSkills Prime, Jun 2026
- Web Development – EduSkills, Mar 2026
- Communication Skills – P2E Skills, YuWaah/UNICEF, Jun 2026
- AWS: Job Roles in the Cloud – AWS Training, Feb 2025
- MySQL Basics – Great Learning, Nov 2024

Languages

English **Hindi** **Marathi**
