Professional Summary

Final-year B.Tech CSE student (CGPA 9.3) targeting an AI + Full-Stack Engineering role. Built AI/ML-driven products end to end: a CNN-based elephant identification model, a recommendation engine in Python, and a Flask + MySQL appointment system with an ML recommender, alongside React/JavaScript front ends and REST API integrations. Strong in DSA (C, C++, Python), comfortable taking features from concept to deployment, and experienced with Git/GitHub in Agile teams.

Technical Skills

Full-Stack: React, JavaScript, HTML, CSS, Tailwind CSS, Flask, REST APIs, Client-Server Architecture

AI/ML: CNN, RNN, Neural Networks, Deep Learning, Supervised & Unsupervised Learning, OpenCV, NumPy, Pandas

Languages: Python, C, C++

Database: MySQL

Tools & Practices: Git & GitHub, Vercel (Serverless Functions), Agile, SDLC, OOP

DSA: Data Structures & Algorithms (C, C++), Problem Solving, Algorithmic Thinking

Internship Experience

DigiSamaksh Private Limited

Jun 1 – Aug 10, 2026

Software Development Intern

- Designed and built an intelligent job-portal recommendation engine in Python, using similarity-matching logic to rank candidates against listings by skills and experience.
- Used NumPy and Pandas to clean and preprocess candidate/job data, improving the relevance of generated matches.
- Worked in an Agile workflow with Git/GitHub, delivering features iteratively from development to review.

Wildlife Institute of India

Mar – Apr 2026

Research Intern (AI/ML)

- Built and trained a Convolutional Neural Network (CNN) to identify individual elephants from photographs, enabling elephant counting and photo-based tracking.
- Preprocessed and augmented image datasets with Python, NumPy, and OpenCV to improve model accuracy and generalization.

EduSkills Virtual Internship (AICTE)

Jan – Mar 2026

Full Stack Developer

Grade: O (Outstanding)

- Completed a 10-week Full Stack Development internship via the National Internship Portal, in collaboration with IILM University.
- Built full-stack web features using HTML, CSS, JavaScript, and REST API integration, following standard SDLC practices.

Academic Projects

AI-Based Doctor-Patient Appointment System

GitHub

Tech Stack: Python, Flask, Machine Learning, MySQL, NumPy, Pandas, REST APIs

- Built a full-stack appointment scheduling system with a Flask REST API backend and MySQL for persistent storage.
- Implemented an AI-driven, symptom-based doctor recommendation model, using NumPy/Pandas for data preprocessing and feature matching.

Library Management System (AI-Enhanced)

Live Demo

Tech Stack: C, File Handling, Basic AI Logic, Serverless Deployment (Vercel)

- Developed a file-based library system in C to manage books, users, and issue/return records.
- Added recommendation logic based on borrowing history and deployed a live demo end to end on Vercel.

Education

IILM University

2023 – 2027

B.Tech, Computer Science and Engineering

CGPA: 9.3

Certifications

Web Development – EduSkills, March 2026

MySQL Basics – Great Learning, November 2024

Achievements and Extra-Curricular Activities

NCC A Certificate Holder (2019–2020): Demonstrated discipline and leadership through active participation in national cadet activities.

House Captain (Nilgiri House) and Basketball Team Captain (2022–2023): Led teams, organized events, and developed strong leadership and teamwork skills.
