PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (CGPA 9.3) seeking a Full Stack / Web Developer role. Skilled in JavaScript, TypeScript, React, Node.js/Express, REST APIs and SQL/NoSQL databases, with Python and ML (CNN) experience from internships at DigiSamaksh and the Wildlife Institute of India. Comfortable with Git/GitHub, code reviews, debugging and Agile teams; focused on clean, maintainable code.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, C++, SQL
Front-End: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design
Back-End: Node.js, Express.js, Flask, RESTful APIs, Third-Party API Integration
Databases: MySQL, PostgreSQL, MongoDB (queries, joins, schema design)
Data & AI/ML: NumPy, Pandas, OpenCV, CNN, Neural Networks, Deep Learning, Generative AI & LLM Basics
Tools & Practices: Git & GitHub, Code Review, Agile/Scrum, SDLC, Design Patterns, Testing, Debugging, Vercel Deployment
Core CS: Data Structures & Algorithms, OOP, Clean/Reusable Code

INTERNSHIP EXPERIENCE

Software Development Intern (Python) — DigiSamaksh Private Limited

- Designed and built a job-portal recommendation engine in Python, ranking candidates against listings by skills and experience.
- Cleaned and analyzed candidate/job data with NumPy and Pandas, improving match relevance; delivered end to end in Agile with Git/GitHub and code reviews.

Research Intern (AI/ML) — Wildlife Institute of India

- Built, trained and tested a CNN in Python to identify individual elephants from photographs for counting and photo-based tracking.
- Preprocessed and augmented image datasets with Python, NumPy and OpenCV to improve accuracy and generalization.

Full Stack Developer Intern — EduSkills Virtual Internship (AICTE), Grade: O (Outstanding)

- Completed a 10-week Full Stack internship (National Internship Portal, with IILM University); built front-end features using HTML, CSS, JavaScript and REST API integration, following SDLC practices.

ACADEMIC PROJECTS

AI-Based Doctor-Patient Appointment System — Live Demo

Tech Stack: Python, Flask, Machine Learning, MySQL, NumPy, Pandas, REST APIs

- Implemented an AI-driven, symptom-based doctor recommendation model in Python (NumPy/Pandas preprocessing and feature matching).
- Built the full-stack scheduling system with a Flask REST API backend and MySQL database (schema design, SQL queries).

Library Management System (AI-Enhanced) — Live Demo

Tech Stack: C, File Handling, Basic AI Logic, Vercel

- Developed a file-based library system in C (books, users, issue/return records) with recommendation logic based on borrowing history; deployed a live demo on Vercel.

EDUCATION

B.Tech, Computer Science and Engineering — CGPA: 9.3

IILM University, Greater Noida (2023 – 2027)

CERTIFICATIONS

- Generative AI Fundamentals and Applications (Gen AI 101) – Nasscom FutureSkills Prime, Jun 2026
- Web Development – EduSkills, Mar 2026
- Communication Skills – Passport to Earning (P2E) Skills, YuWaah/UNICEF, Jun 2026 (Score: 100%)
- AWS Certification: Job Roles in the Cloud – AWS Training and Certification, Feb 2025
- MySQL Basics – Great Learning, Nov 2024
