PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (**CGPA 9.3**) seeking a Full Stack Developer role with **JavaScript, TypeScript, React, Node.js, and Python**. Experienced in **ML work (CNN)** and **Agile workflow**.

with a focus on clean, maintainable, tested code.

INTERNSHIP EXPERIENCE

DigiSamaksh Private Limited

Key Project: Job Portal Recommendation Engine

- ▶ Designed and built a job-portal recommendation engine in Python, using similarity-matching logic to rank candidates against listings by skills and experience.
- ▶ Cleaned, preprocessed and analyzed candidate/job data with NumPy and Pandas, improving the relevance of generated matches.
- ▶ Owned features end-to-end in an Agile workflow: development, debugging and testing, with Git/GitHub version control and code review before delivery.

Git / GitHub

Jun 1 – Aug 10, 2026

Research Intern / ML Engineer

Wildlife Institute of India

Key Project: Elephant ID Recognition with CNN

- ▶ Built, trained and tested a Convolutional Neural Network (CNN) in Python to identify individual elephants from photographs, enabling counting and photo-based tracking.
- ▶ Preprocessed and augmented image datasets using Python, NumPy and OpenCV to improve model accuracy and generalization.
