📖 LeetCode

PROFESSIONAL SUMMARY

Final-year B.Tech CSE student (**CGPA 9.3**) seeking a Full Stack Developer role with **JavaScript, TypeScript, ReactJS, NodeJS** and **Python** experience. Completed ML work (**CNN**) and **Agile** workflow. Strong focus on **code review**.

, with a focus on clean, maintainable, tested code.

INTERNSHIP EXPERIENCE

DigiSamaksh Private Limited

Key Project: Job Portal Recommendation Engine

- ▶ Designed and built a job-portal recommendation engine in Python, using similarity-matching logic to rank candidates against listings by skills and experience.
- ▶ Cleaned, preprocessed and analyzed candidate/job data with NumPy and Pandas, improving the relevance of generated matches.
- ▶ Owned features end to end in an Agile workflow: development, debugging and testing, with Git/GitHub version control and code review before delivery.

Python

NumPy

Pandas

Agile

Git / GitHub

Jun 1 – Aug 10, 2026

Research Intern / ML

Wildlife Institute of India

Key Project: Elephant ID Recognition with CNN

- ▶ Built, trained and tested a Convolutional Neural Network (CNN) in Python to identify individual elephants from photographs, enabling counting and photo-based tracking.
- ▶ Preprocessed and augmented image datasets using Python, NumPy and OpenCV to improve model accuracy and generalization.

Full Stack Developer Intern

Jan – Mar 2026

EduSkills Virtual Internship (AICTE)

10-Week Full Stack Internship · Grade: O (Outstanding)

Completed a 10-week Full Stack internship (National Internship Portal, with IILM University); built front-end features using HTML, CSS, JavaScript and REST API integration, following SDLC practices.

SDLC

KEY PROJECTS

AI-Based Doctor-Patient Appointment System

Full-stack appointment scheduling with Flask REST API backend and MySQL (schema design, SQL queries). AI-driven symptom-based doctor recommendation using NumPy/Pandas preprocessing and feature matching. [Live Demo](#)

Python

Flask

Machine Learning

MySQL

NumPy / Pandas

REST APIs

Library Management System (AI-Enhanced)

File-based library system in C (books, users, issue/return records) with recommendation logic based on borrowing history. Live demo deployed on Vercel. [Live Demo](#)
